Tech enthusiast, with a bachelor's degree in Computer Science and years of work experience in an IT driven environment. Knowledgeable in computer systems from installation to maintenance & troubleshooting. Skilled in English communication, either written or oral. Adaptive. Innovative. I always see to it that my cup is not empty or full. Not a fan of working hard and thinking outside the box, but a big fan of working smart and thinking like there is no box. Seeking employment where I can help make the company reach its prime growth.

Strengths:

Science and Technology savvy.

Ability to quickly learn new technologies and things.

Technical and logical approach to problem-solving.

Can develop solutions through programming, if the need arises.
